

**we
know
screens**

Combine artwork and sound absorbing properties with Zorb - customised fabric panels for walls, storage cabinets and ceilings that can improve the acoustics of any room.

Constructed of lightweight materials and easy to hang, Zorb panels are available in a range of different sizes. The panels can be either upholstered in fabric to complement our Stitch or Simple range of products or covered with graphics to suit your scheme.

Perfect for meeting areas, receptions or offices, Zorb is particularly effective where there is sound reverberation or high levels of noise. Brand them with your company logo or print something completely different to create a visually stunning, but also practical, piece of art.
