tubestation

Power and data wherever you want it. The innovative tube design is elegant, robust and easy to specify. It frees up space, keeps things organised and is endlessly flexible.

Created by Icon, Tubestation was borne out of a simple desire to make the delivery of power and data more accessible, without having to rummage under the desk every time you needed to plug something in.

Tubestation is a versatile data/power and cable management system that neatly and elegantly delivers power and connectivity wherever you need it, while also providing flexible structure that can be utilised to create a workstation in any area of the office.

Tubestation is designed to work together with a number of accessories to create a highly functional platform to help define your workspace. Specifying it is so simple and it has hundreds of uses in the office – and beyond. All it takes is a little imagination to understand how Tubestation could work for you.
